The numbers behind this list

Every price on the front page is anchored to published 2026 US industry data — this page shows where each number comes from, and how wide the market band is. Where you land inside a band is your market position, your costs and your call.

Service	This list	2026 US band	Sources
Mowing, standard	\$50	\$30–85, avg \$50	GreenPal; LawnStarter \$43–70
Mowing, large	\$70	upper band	GreenPal; Jobber \$50–250
Biweekly	\$60	+15–25% per visit	Housecall Pro
Leaf cleanup ¼ acre	\$225	\$160–290	LawnStarter; Angi \$200–500
Aeration + overseeding	\$55	\$30–80/ksqft	HomeGuide; CountBricks

Bands are a synthesis across the named sources; individual publishers' own ranges sit above or below. Verified September 2026 · full database: mainstreettoolbox.com/benchmarks/service-pricing-2026/

How to work this list

Price the stop, not the grass

Mowing is route economics: 12 lawns on one street at \$45 each beats 4 lawns across town at \$70. Density beats rate.

Biweekly costs more per visit

Longer grass takes longer to cut — +15–25% per visit (Housecall Pro). Say it out loud when clients ask to switch.

Leaf cleanup: charge the job, mind the weather

Wet leaves can double the time. Quote dry-season rates and add a weather clause for late-fall bookings.

The stop fee

Out-of-route jobs carry a \$40–135 stop fee (LawnSite operator reports). Bundle neighbors onto one route day and the fee becomes margin.

Pre-pay seasonal

5–10% off for the season paid upfront — their cash, your guaranteed calendar.

US pricing across the map — what the data shows

National bands hide huge regional spreads. These are the published data points for this trade — use them to place your city on the map.

Market / region	What the data shows	Source
National baseline	\$30–85 per visit, average ~\$50; LawnStarter puts most homeowners at \$43–70	GreenPal; LawnStarter
Full-service skew	Angi's \$49–203 range includes large-lot, full-service crews — most residential mowing sits far lower	Angi; Jobber \$50–250
Cost drivers	Lawn size is the biggest factor; region, terrain, obstacles and whether edging/blow-cleanup is included move the rest	GreenPal; Mammotion

Regional points are as published by the named sources. Where your city isn't listed, the coastal/metro premium pattern is the planning heuristic — then validate locally (next page).

How to judge YOUR local market — the five-step method

1. **Start from the national band** — pages 1–2 of this kit.
2. **Apply the regional adjustment** — coastal metros +20–50% across our research; small towns slightly under. Your state's cost-of-living index is a reasonable proxy.
3. **Compute your cost floor** — (your loaded hours + materials/supplies) for the job. No quote below the floor, ever. It's the line between a business and a hobby.
4. **Validate locally** — three published local prices (Angi/HomeGuide zip-level or competitor pages) tell you where the market actually clears.
5. **Set your band and review quarterly** — booked out two weeks straight? Move up. Empty for a month? Your floor is above your market.

Worked example — 1/4-acre weekly mowing, Dallas TX

Step 1. National band: \$40–60 weekly for a standard yard; Texas cost base sits near national.

Step 2. Route math: dense subdivisions → 12 lawns per day at \$45–55 each beats scattered \$70 jobs.

Step 3. Cost floor: 30 min on site + 15 min drive+dump = \$30 loaded cost per stop at \$40/hr equipment-in. \$45+ keeps >40% margin.

Step 4. Validate: check GreenPal's zip-level data and two local crew prices; land at \$45–50 and hold it.

Mowing is a route business. The lawn is the unit; the ROUTE is the business.

Strategy — the five plays that move the number

Sell the route, price the stop

Every lawn you add on an existing street costs you minutes, not a truck roll. Cluster pricing: full price solo, −\$5 when two neighbors book the same day.

Biweekly is a different job

Longer grass takes longer — +15–25% per visit. Quote it as its own service, not a discount on weekly.

Seasonal cash

Pre-paid seasonal mowing (−10%) and fall cleanup bundles front-load cash for equipment. Aeration/overseeding in fall is the highest-margin add-on you sell.

Minimums protect you

One-off mows below \$40 don't pay for the truck roll. Minimum visit charge, stated on the phone.

Raise through capacity

When you're turning work away, raise new-client rates 10% first — regulars follow on the next season renewal.
